Supply Chain Complexity, Simplified

AI Mapping provides a deep, comprehensive map of your supplier base going several tiers deep. Through publicly disclosed domain sources filtered through our database, Resilinc's AI Mapping eliminates noise, reduces false positives, and evolves through continuous self-improvement based on feedback from our network.

Data Cleansing and Normalization

Our sophisticated AI Mapping tool applies a suite of advanced analytic techniques to meticulously cleanse, de-duplicate, and normalize data. This process transforms raw, noisy data into structured, actionable insights, ready for strategic application. Discover a view of your complete supply chain - excluding indirect suppliers and 3PL companies.

Cost-Effective Solution to Accelerate Supply Chain Insights

AI mapping, an affordable foundational tool part of our subscription service, quickly enhances visibility into your supply network. For those seeking a deeper, more nuanced visibility, Resilinc offers advanced solutions for a comprehensive picture of your supply chain.

Depth and Breadth of Insights

Our powerful AI web scanning system analyzes billions of records for part-level and site-level insights. Going through product teardowns to trace parts and suppliers three tiers deep, AI Mapping offers a comprehensive view, revealing the hidden interconnections and dependencies that shape your supply network.

Enhanced Visibility

- ✓ Gain proactive visibility into sub-tier networks
- ✓ Understand suppliers' suppliers and their global sub-contractors for a comprehensive risk assessment
- ✓ Continuous supplier feedback and verification

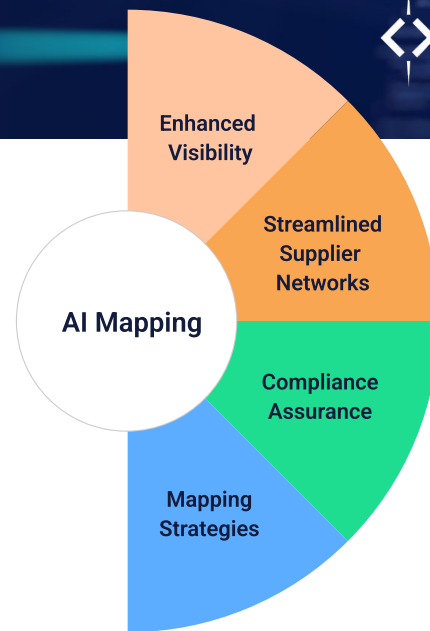

Streamlined Supplier Networks

- ✓ Quickly understand the multi-tier network of small suppliers
- ✓ Overcome challenges like uncooperative suppliers reluctant to provide mapping
- ✓ Navigate the complexities of supplier relationships efficiently and gain rapid insights

AI Mapping provides and excellent starting point for addressing compliance-related issues. It offers valuable visibility into areas where suppliers have traditionally been less collaborative."

Senior Manager, Procurement and Supply Chain

Compliance Assurance

- ✓ Fulfill urgent Environmental, Social, and Governance (ESG) due diligence needs
- ✓ Identify suppliers and locations affected by geopolitical conflicts and legislation
- ✓ Ensure compliance and strategic risk mitigation
- ✓ Go to the nth tier quickly for raw materials in order to be in compliance with UFLPA

Comprehensive Mapping Strategies

- ✓ Site Mapping: Discover manufacturing locations
- ✓ Part-Site Mapping: Tie products and parts to respective suppliers' manufacturing plants
- ✓ Sub-Tier Mapping: Map the complete supply chain, excluding indirect suppliers and 3PL companies
