Visibility Across Every Tier of Your Supply Chain

Go beyond your tier-1 suppliers with validated supplier data across every tier of your supply chain, down to the raw material level, leveraging both autonomous AI mapping and supplier-validated mapping for actionable insights.

Collaborative Ecosystem for Supply Chain Resilience

Resilinc is the only solution on the market that facilitates communication and coordination amongst your supply chain stakeholders and suppliers when disruption strikes, all in one platform.

Demonstrable ROI: Enhancing Your Bottom Line

Our solution is crafted to deliver measurable ROI by reducing operational disruptions, mitigating risks, and generating critical competitive advantage.

Streamlined Sub-Tier Supplier Onboarding Experience

Resilinc's ISO certified 5-step process and dedicated partner relations team transform the onboarding experience.
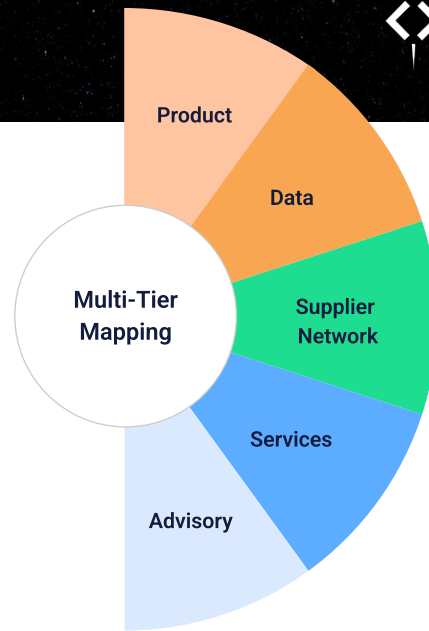

"

By preventing disruptions that could have impacted our revenue due to lack of visibility and identifying priorities to lower supplier risks, we protected revenue and margin, and earned the trust and praise of our COO and CFO."

Global Director of Procurement

Multi-Tier Mapping Capabilities

Multi-Tier Mapping Illuminates Bottlenecks

Resilinc's unique open platform, best-in-class data, and cutting-edge technology drives our customers' success by advancing opportunities across finance and purchasing, operations and demand planning, and manufacturing and transportation. Our solutions can be delivered on-prem, in cloud, or via API / ETL.

Product

- Real time monitoring in 100+ languages
- Risk Score at supplier, site part level
- Sub-tier failure points analysis
- What-if simulator
- Revenue impact
- Geographic hotspots
- Predictive analytics for impact during events

Data

- 4 million parts mapped to 800K sites
- Sub-tier suppliers, sites, and categories
- Tier 1 to 5 mapped
- Drilldown to raw materials and commodities
- 25+ technology partners providing data and advisory services

Supplier Network

- Plug & play with pre-mapped suppliers
- Tailored supply chain map (company specific, not industry specific)
- 90%+ response rate from suppliers

Services

- Supplier onboarding and training
- Lifetime project management services
- Technical implementation and digitization services
- Quarterly executive reviews and roadmap alignment
- AI powered data normalization

Advisory

- Maturity Model
- Incentive alignment
- Stakeholder mapping
- Supplier metrics and QBRs
- Governance advisory
